

**ABOUT 8e6 TECHNOLOGIES**

8e6 Technologies is a privately held company and the leading independent provider of Internet filtering and insider threat management solutions for mid-size to large enterprises, protecting millions of users worldwide.

The company's award-winning appliance suite requires no additional infrastructure or software to install, resulting in the lowest total cost of ownership on the market. 8e6 is recognized for its real-time analysis, reporting capabilities and unmatched forensics that reduce security, legal and compliance risk. The company's solutions are customizable to meet individual customer requirements, yet are powerful enough to meet the performance demands of the largest corporations in the world.

As the leading provider of Internet filtering and reporting solutions to the K-12 market, 8e6 addresses the challenges of student safety by giving network administrators and educators the tools to view, understand and react to Web-based threats arising from online learning.

**HISTORY**

Originally founded in 1995 as Log-on-Data Corporation with the X-Stop filter, 8e6 Technologies is the original filtered URL lists pioneer. To this day, the ability to create effective methods of categorized URLs remains one of the company's key strengths.

The company changed its name to 8e6 Technologies in late 2000, following a round of venture capital investment. Today 8e6 develops high-speed Internet Filtering and Reporting solutions for the enterprise and education markets. In particular, 8e6 is focused on meeting the unique needs of the large enterprise to secure their network from user generated Internet threats. 8e6 accomplishes this with purpose-built appliances with unmatched scalability and reliability.

The company's initial focus was to provide a pornography-free Internet for children and families by offering filtering software for individual computers in the educational market, including libraries, schools, and ISP's. The business evolved to offer more tools to assist in the management of Internet access and unwanted email, across multiple platforms.

The company maintains headquarters in Orange, California, with a satellite office in Taiwan and a network of channel partners worldwide.

**CORPORATE MISSION**

8e6 Technologies provides innovative tools to manage and control our customers' Internet threats.

- X-Strikes & Real-time Probe for automatic remediation
- 100+ category database enhanced by a customer feedback module
- Advanced logging, forensic analysis, drill-down reporting and archiving
- Real-time monitoring of Internet threats
- Centralized multi-level, multi-site administration for companies with multiple branch offices

## FINANCIAL HIGHLIGHTS

8e6 has experienced remarkable growth and recognition since 2007. Bookings in 2007 grew 38 percent from 2006, a figure representing growth much higher than the industry average of 11.8% noted by industry analyst IDC. We expect to continue this rate of growth throughout 2008. The Company has approximately 7.2 million user seats under current license.

## WHY THE NAME 8e6?

You might be wondering how the name "8e6" came about. It's fairly well-known that "eighty-six" is commonly used as a verb meaning "get rid of." That's what we do with inappropriate Web content; we get rid of it. Hence the fit with our company. The lower-case "e" was added to distinguish our name from the pure number and to give it a more high-tech appearance.

## 8e6 AWARDS AND ASSOCIATIONS

For the second consecutive year, **SC Magazine** has named 8e6 Technologies' Internet filtering, reporting and monitoring appliances a "Best Buy" for 2008. The Web Content Management Review examined solutions from several of the top Internet filtering vendors and declared 8e6 Technologies' solution the best among its competitors in back-to-back evaluations.

The **Internet Watch Foundation (IWF)** is a UK-based organization that operates as an Internet 'Hotline' for the public and IT professionals to report inadvertent exposures to potentially illegal content online. 8e6 Technologies utilizes the IWF list to enhance its URL database.

8e6 Mobile Client was awarded the prestigious "Award of Excellence" by **Technology & Learning Magazine**. The Technology & Learning "Award of Excellence" is a prestigious 25-year-old recognition program, with software and Web products that break new ground in some important way and also demonstrate clear superiority over similar products in the market.

8e6 Technologies received their second **West Coast Labs** Checkmark Premium Level Certification for Web Filtering. West Coast Labs is one of the world's foremost independent test laboratories. This certification applies to the latest version of 8e6's R3000, the company's flagship Web filtering appliance.

## 8e6 SOLUTIONS

### 8e6 Professional Edition

Enhanced with Real-Time Threat Management

The Professional Edition suite offers the most comprehensive solution available to protect organizations from threats inside the network. Integrating best-in-class URL filtering, forensic Web usage reporting and real-time monitoring and mitigation of insider threats, the Professional Edition's award-winning performance delivers power, ease of use and unmatched scalability.

*The 8e6 Professional Edition Suite Includes:*

#### 8e6 Internet Filter:

Offers high-performance, enterprise-level filtering optimized for speed and scalability. Filters URL's, anonymous proxies, spyware, Instant Messaging, Peer-to-Peer and other emerging threats utilizing the 8e6 100+ Category Database enhanced by Intelligent Footprint Technology™.

#### 8e6 Enterprise Reporter:

Processes and displays Internet filtering logs without impacting filtering and network functions. Built on a dedicated MySQL database, it uses a graphical interactive data-mining interface to generate detailed or summarized reports.

#### 8e6 Threat Analysis Reporter:

Delivers up-to-the-minute graphical snapshots of Internet traffic and is supported by real-time management tools to identify and control user-generated Web threats.

#### 8e6 Mobile Client:

A filtering software that works in conjunction with the R3000 mobile solution to filter remote/off-site users. It works with PC and Mac laptops and enables centralized reporting with the 8e6 Enterprise Reporter.

#### 8e6 ProxyBlocker:

An appliance specifically designed to work in environments not utilizing an 8e6 filtering solution, it detects and blocks Web-based proxies/anonymizers on the fly using "Proxy Pattern Detection."
