

# 8e6 MobileClient

## For Remote PC and Mac Laptops

The corporate world is becoming more remote and mobile every day. Driven by improvements in web-based applications, wireless technologies and laptop computers, large numbers of employees are working in smaller remote offices, at home or on the road. This has led to the problem of corporate IT staffs not having a comprehensive and cost effective solution to enforce corporate Internet use and security policies for remote or mobile devices. These environments require the same professional grade filtering and security available in their larger corporate sectors.

### PROFESSIONAL GRADE FILTERING!

**ANYWHERE. ANY CONNECTION. ANYTIME.**

To address these urgent needs, 8e6 Technologies has developed the 8e6 Mobile Client to filter and secure off-site users from accessing inappropriate and malicious Web content.

As a software-based application that works in conjunction with the R3000 Mobile appliance, it's simple to deploy, manage and maintain.

Most importantly, the 8e6 Mobile Client provides centralized, seamless and tamper-proof filtering for remote users anywhere, anytime, regardless of their Internet connection.

### KEY FEATURES:

#### Remote Security Web Filter

- Filters URLs, spyware, Instant Messaging, Peer-to-Peer and other emerging Internet threats
- Indirectly secures internal/local network against spyware, malware and other malicious content that come from unfiltered remote laptop computers

#### Advanced Filtering Options

- SafeSearch enforcement on search engines including images (Google, Yahoo, AOL and Ask)
- Search Engine and URL keyword filtering

- Configurable user lockout
- 100+ comprehensive human-verified categories
- Blocks access to anonymous proxies
- Centralized configuration and remote administration
- Transparent to user and tamper-proof

#### Centralized Web Use Reporting

- Centralized reporting using an 8e6 Enterprise Reporter
- Powerful cross-referenced and customized Web use reporting
- Reports by user name, machine name, IP address, and MAC address

#### Configuration and Integration

- Auto-network detection for a seamless internal and external Web filtering experience

#### Remote Filtering Components

- 8e6 Mobile Client application
- 8e6 R3000 Mobile filtering appliance

#### System Requirements

- Windows XP and Vista
- Macintosh OS X Version 10.4 and higher

# 8e6 MobileClient

For Remote PC and Mac Laptops

8e6 Technologies is the leading independent provider of Internet filtering and insider threat management solutions for mid-size to large enterprise, protecting millions of users worldwide. Recognized for its real-time analysis, reporting capabilities and unmatched forensics; 8e6 helps reduce security, legal and compliance risks.

8e6 Technologies recently merged with Marshal to become Marshal8e6, a new global provider of Secure Internet Gateway products delivering comprehensive content security for Web and email on multiple platforms including software, appliances and Software-as-a-Service (SaaS).

Corporate headquarters are located in Orange, California with international headquarters in London, UK and regional offices in Atlanta, Houston, Auckland, Johannesburg, Munich, Paris, Sydney and Taipei.

## Recommended Products:

### 8e6 Professional Edition

Integrates best-in-class URL filtering, forensic Web usage reporting and real-time monitoring and mitigation.

### 8e6 ProxyBlocker

An appliance specifically designed to work in environments not utilizing an 8e6 filtering solution, it detects and blocks Web-based proxies/ anonymizers on the fly using "Proxy-Pattern Detection."
