

What's New in the R3000 '1.10.20' Version

This newest release of software for the R3000 Enterprise Filter requires an R3000 unit running software version 1.10.10 or later.

IMPORTANT NOTICE: *8e6 recommends applying the 1.10.20 software at a time when a brief outage in filtering would be acceptable, as an approximate 5-minute outage in R3000 filtering services will occur when executing this upgrade. When this software version is applied to the server, the server will reboot automatically. Once applied, this software update cannot be uninstalled.*

Enhancements

- Enhancements were made so that the R3000 now supports daylight savings time.
- A modification was made to the 8e6 Authenticator to prevent the authentication service from becoming overloaded.
